

REPORT ON THE SEMINAR ON NATURE AND WILD LIFE PHOTOGRAPHY
ORGANISED BY Mr. Suhas , Soul Scope for I year BCOM Students

Date : 15th April 2015

Time : 11:00-2:00pm

Venue : Audio Visual Room No 8

There is nothing in a caterpillar that tells you, its going to become a butterfly.
Only with the leaf can I talk to the forest. A bird sitting on a tree is never afraid of
the branch breaking.

In order to see birds, we must become part of the silence.

Go slowly, my lovely moon, go slowly

With these deeply touching romantic words, Mr. Suhas, enthralled the audience at the start of his speech on ' Nature and wild life photography'.

One of his quotes was 'What is this life.' It was from W.H.Davies famous poem

Of observing nature and experiencing the thrill of living life to the frull. His advice to the students was to spend time going on hikes, visiting wild life parks, bird sanctuaries and zoo.

The students were very much taken up by the slides shown on screen. Next he went to tips on wild life photography. The following are the tips:

- Be creative with wild life
- Take a stump and put some food on it. It will attract the birds
- Background and foreground lighting is very important.
- Find a place where there is yellow leaves

The angle of the camera is very important. Single auto focussing point and lighting is also very important. Walking and patience must be practiced if one wants to become a wild life photographer.

Last but not the least use a Canon or Nikon Camera for best results.

The programme was highly appreciated and the applause was thundering.

Vote of thanks was proposed and conducted by Ms. Sowmya
